in piyushhardasani

Alpha-330

#### **EDUCATION**

## Software Development Program

Masai School July 2024 - February 2025

### **BCA**

Anand Engineering College July 2021 - July 2024

## **TECHNICAL SKILLS**

JavaScript | Node.js | React | HTML5 | Git | CSS3

## **SOFT SKILLS**

Problem Solving | Time Management | Adaptability | Teamwork

## Piyush Hardasani

## Full Stack Web Developer

## **PROFESSIONAL SUMMARY**

Dynamic Full Stack Web Developer skilled in JavaScript, React.js, Node.js, and MongoDB, with strong expertise in building scalable web applications using the MERN stack. Adaptable to new technologies and adept at learning quickly. Effective collaborator, leveraging Generative AI, to enhance software excellence.

## **PROJECTS**

# 1. Task Management Application | ⊕ | • JavaScript | Node.js | Git | React | Responsive Web Design | CSS3 | HTML5

- Developed a responsive web application using JavaScript, React, and CSS3 to manage tasks effectively.
- Implemented server-side logic with Node.js, ensuring efficient task handling and seamless integration.
- Utilized Git for version control and collaborative development workflows.

## 

- Developed a fully functional Quiz App using the MERN stack, ensuring scalability and performance.
- Designed and implemented efficient server-side APIs using Node.js and Express.js to handle quiz data.
- Integrated Redux for state management, enhancing the app's user interface and overall performance.
- Utilized responsive web design principles to ensure compatibility across various devices and screen sizes.
- Conducted thorough testing and debugging to ensure the application's reliability and stability.

# 3. Productivity Suite (Productivity Manager Website)

## Redux | Node.js | Express.js | MongoDB | JavaScript | React

- Collaborated with designers to create an interactive and user-friendly interface using React, enhancing the learning experience.
- Designed and developed server-side APIs with Node.js and Express.js to handle quiz functionalities and real-time feedback.
- Implemented Redux to manage application state, ensuring efficient data flow between components.
- Created and optimized MongoDB database models and queries to store quiz data and user results efficiently.
- Conducted thorough testing and debugging of the application to ensure high reliability and seamless user experience.
