Masai

Piyush Hardasani
Full Stack Web Developer

Professional Summary

Skilled Full Stack Web Developer adept in utilizing JavaScript, React, and Node.js within the MERN stack. Demonstrates strong problem-solving and adaptability with proficiency in crafting efficient APIs and optimizing database models. Quickly learns new tech, including Generative AI, to drive innovative solutions.

Projects

Task Management Application   Live Demo Link   Github Repo Link

JavaScript   Node.js   Git   React

Responsive Web Design   CSS3   HTML5

- Implemented user-friendly interfaces using React and achieved responsive design with HTML5 and CSS3.
- Leveraged Git for version control to enable collaborative development workflows.

Productivity Suite (Productivity Manager Website)   Live Demo Link   Github Repo Link

Redux   Node.js   Express.js   MongoDB

JavaScript   React

- Designed and implemented interactive user interface for the quiz application using React.js, ensuring engaging user experience.
- Developed server-side APIs using Node.js and Express.js to handle quiz data and user interactions efficiently.
- Integrated MongoDB to create and manage database models for storing quiz questions and user progress.
- Ensured seamless integration between frontend and backend components, facilitating real-time feedback for users.

Quiz App   Live Demo Link   Github Repo Link

Redux   Node.js   Git   JavaScript   React

Responsive Web Design   RESTful APIs

- Created interactive and responsive web interfaces using React and JavaScript.
- Used Git for version control to maintain code quality.
